### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: The prior art of record taken alone and in combination does not disclose "a system to determine and analyze the dynamic internal load in rotating mills, for mineral grinding, the system comprising: (b) synchronism sensing means to synchronize the revolving movement of the mill and processing and control means to:

(i) determine the load foot angle, corresponding to the estimated position where the lifters contact the load in motion;

(ii) determine the load shoulder angle, which corresponds to the location where the load or load cataract starts to fall towards the load foot; and

(iii) determine on-line the volumetric filling of the dynamic load, when the mill is operating" as recited in claim 1. These limitations are neither taught nor made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jacques M Saint-Surin whose telephone number is (571) 272-2206. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (703) 305-4705. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
